AB Cube | SafetyEasy®
A composable safety platform. Start where you need. Scale when ready.

Begin where your pharmacovigilance operations need support most: the SafetyEasy database, safety intake automation, literature screening, or medical information management. Then connect the pieces into one scalable ecosystem over time.

CHOOSE THE PRODUCT THAT MATCHES YOUR OPERATING NEED.

Safety Database

SafetyEasy® Multivigilance Database

The validated system of record and operations backbone for safety teams.

- Case lifecycle management
- Multivigilance workflows
- Submissions, reporting, compliance, and oversight

Fully compliant & configurable safety database that matches your workflows

Focused Product

SafetyEasy® AI Case Intake

Automate safety intake and turn incoming safety information into case-ready data — with or without replacing your current safety database.

- Email and document intake
- Partner and ICSR intake
- Existing safety database environments

One intake layer for every safety source.

Focused Product

SafetyEasy® Literature Management

Manage literature screening obligations with reviewer workflows, case candidate identification, and audit-ready evidence.

- Search strategy configuration
- AI-assisted relevance screening
- Reviewer decisions and reproducible evidence

A complete literature workflow, from screening to evidence

Focused Product

SafetyEasy® Medical Information Management

Manage medical inquiries as a dedicated workflow, with AI classification, adverse event detection, and PV handoff.

- Medical information teams
- Omnichannel inquiry management
- AE detection from inquiries

Structured inquiry handling with built-in PV escalation.

Buy a focused workflow first or run the full SafetyEasy® product portfolio

Focused Products: AI Case Intake, Literature Management, Medical Information

Safety Database: Database, workflows, reporting, oversight
